

CONNECTA IoT SMART METER MODEM

Engineered for Seamless
Integration with
Utility Meters

End-to-End Secure Direct to Satellite Connectivity Services

Connecta IoT Network

Introducing the Connecta IoT Smart Meter Modem

The Smart Meter Modem is an advanced solution designed for seamless integration with gas, water, and electricity meters. It ensures reliable data logging and transmission, even in remote locations with limited connectivity. With its versatile design and robust functionality, it's the ideal choice for modern utility management applications.

Quick Deployment

Seamlessly integrate the Smart Meter Modem with gas, water, or electricity meters over a serial interface. The modem supports pulse reading for mechanical meters and complies with the IEC 62056 standard for advanced electricity meters, ensuring compatibility and efficiency. Designed for reliable operation in remote and hard-to-reach areas, it facilitates energy-efficient and uninterrupted connectivity for modern utility management.

Key Features

- LoRa/LR-FHSS transceiver with embedded LoRaWAN protocol stack
 - Available frequency options: EU868 or US915
 - Up to 51-byte payload size

- Compatible with all electricity meters that implements IEC-62056-21
 - Various index data, read when needed
 - Automatic baud rate adoption

- Pulse reading on water, gas meters
- Serial interface for seamless sensor integration
- Compact dimensions: 100x100x54 mm
- Includes mounting accessories for flexible deployment:
 - Pole-mounted
 - Wall-mounted
 - Magnetic base

Benefits

Leading to up to **25%** reduction in meter reading costs in remote and rural areas.

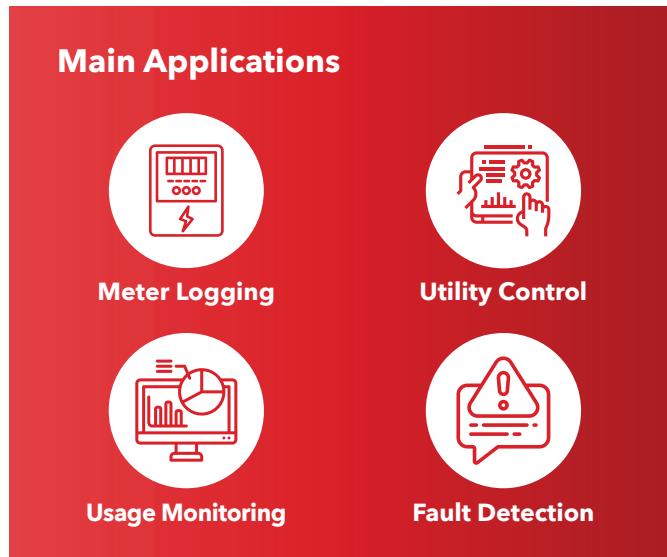

Simplifies metering device integration with an intuitive RS485, and optical port interface.

Reduces contributing to the carbon footprint by up to **15%** for all related activities.

Supports vast networks with minimal infrastructure requirements, making it ideal for rural and underserved areas.

	SMART METER MODEM DEVICE FAMILY		
	SMM LITE	SMM LITE SOLAR	SMM PRO
POWER SUPPLY	BATTERY	RECHARGEABLE BATTERY	EXTERNAL
VOLTAGE RANGE	3.3 VDC	3.3 VDC	9-36 VDC or 220 VAC
GNSS CAPABILITY	NO	OPTIONAL	OPTIONAL
WIRELESS INTERFACE	NO	NO	LoRaWAN®
BATTERY BACKUP	-	-	YES
PULSE READING	OPTIONAL	YES	YES
